

January 25, 2019

Dear Residents,

The Village of Garden City has asked the West Hempstead Water District to assist them in supplying them with water during construction of their new water tower. This work will include demolition of their existing water tower and the construction of a new one.

This construction is slated to begin in early February through the fall of 2019. Testing of the system will begin on January 28, 2019 through the week.

During this period of construction, you may experience fluctuations in water pressure and/or temporary water discoloration during the course of the day. However, the water is safe to use. We anticipate these inconveniences to last only a few days.

Here are some recommendations you can follow in preparation:

- Draw water for cooking ahead of time
- Store bottles of water for drinking
- Be sure to check the water quality before using your washing machine or dishwasher

Should you have any questions or concerns please do not hesitate to contact this office at. (516) 483-1180. Thanking you in advance for your cooperation.

Very truly yours,

Robert P. York

Robert P. York
District Superintendent
